## MIZUNO CREW 21

# MIZUNO GLOBAL SUSTAINABILITY

MIZUNO CREW 21 was launched in September 1991 as our global sustainability commitment to protect the planet for future generations. As Mizuno recognized that all corporate business activities

affect the environment, we focused on contributing to the preservation of the global environment with our company activities every day. Starting April 2021, we have been designating all the Mizuno Sustainability activities as **"MIZUNO CREW 21"**

We will contribute to social, economic, and environmental sustainability, as well as the fulfillment of our relevant activities by integrating innovations and constantly improving our products and services. We endeavor to ensure a future in which people cultivate a healthy mind and body through sport.

## VISION

We believe in a sustainable future in which all people live equally on a safe and healthy planet. While respecting the dignity of all people, we will continue to nurture a beneficial future, where sports can be enjoyed anytime, anywhere and without reservation.

## MISSION

To protect our planet earth, the stage on which we play sports. By integrating innovations in our products and services, based on science, for the benefit of society and inspired by nature, we endeavor to ensure a future in which people cultivate a healthy mind and body through sports.

## PURPOSE

Mizuno CREW 21 is our global sustainability commitment to protect our planet for future generations.

## ENVIRONMENT

We are committed to achieving a sustainable society through actively contribute to the conservation of the global environment in all business activities and actions of all individuals.

As we provide products and services that embody the diverse value of

sports, protecting the global environment where people around the world can live with peace of mind and play lively sports is an important issue.

## HEALTH

Believing in the collective power which sports can contribute to the mental and physical health of people.

Sports have the ability not only to maintain physical and mental health, but also to foster communication across countries and generations by contributing to bring out the potential of people and regions.

Mizuno supports more people to access sports and contributes to the realization of a richer and more sustainable society in which each person can shine.

## HUMANITY

United in respecting diversity to contribute to the realization of a future in which all people respect, understand and accept each other.

We believe in a world in which all people can live in equally. To bring us closer to that - our company respects the diversity of all people and provides better sporting equipment, places and opportunities for playing sports to all, regardless of nationality, race, gender, age or physical ability, through our sincere business activities.

# WAVE NEO ULTRA

INSPIRED BY NATURE / DRIVEN BY PERFORMANCE

This eco-conscious shoe offers unprecedented comfort that makes running a joy. It is loaded with Mizuno's signature cushioning and energy return features, including MIZUNO ENERGY CORE which boasts the highest functions of the MIZUNO ENERGY series. With this shoe, Mizuno strives to care for the environment through materials with low environmental impact, reduction in dyeing water and CO2 emissions.

## SPECIFICATIONS

WEIGHT	295g (M) / 250g (W)
SIZES	UK 6-12, 13, 14 (M) / UK 4-9 (W)
STACK MM	31.0 / 39.0

**TARGET CONSUMER** Mainly targeted at runners of the younger generation who are interested in environmental conservation. For runners who want to enjoy running rather than focusing on time.

**AW23 UPDATE** New Color

**53 - M** Undyed Black / Luminous

**73 - W** Undyed Black / Starlight

## SUSTAINABILITY

**MATERIALS:** More than 70% recycled content on upper body textile. More than 90% recycled content on upper body lining textile. More than 90% recycled content on sockliner lining. Plant-based material (Pebax Rnew®) infused MIZUNO ENERGY LITE. Part of the midsole made with algae from BLOOM™. Part of the sockliner made with algae from BLOOM™.

## BENEFITS

- Dope-dyed yarn, coloured pellets are added during the yarn making process, thus no water is needed to dye the yarn.
- MIZUNO ENERGY LITE, uses plant-based materials and offers excellent cushioning, energy return and lightness, is inserted in the top midsole.
- MIZUNO WAVE, the midsole with its wavy structure is composed of two layers, which differ in hardness, boosts stability without sacrificing cushioning.
- G3 Outsole provides strong grip at a light weight.

# MONARCIDA NEO II SELECT JR

## LIGHTWEIGHT COMFORT

This boot with screw-in studs offers a wide fit, lightweight comfort, and a ZeroGlide removable sockliner for enhanced foothold. It builds on elements from the MORELIA NEO III including the forefoot upper pattern and shoe lacing system.

### SPECIFICATIONS

WEIGHT	160g
SIZES	UK 1-5
MATERIALS	SYNTHETIC

**TARGET CONSUMER** Specifically for players looking for comfort on the pitch.

**AW23 UPDATES** New Color

**64** Fiery Coral 2 / White

**50** Black / Gold

### SUSTAINABILITY

**MATERIALS:** More than 50% recycled content on upper body synthetic leather base fabric.

### BENEFITS

- Featuring ZeroGlide removable sockliner for enhanced foothold and maximum comfort.
- The forefoot upper pattern is similar to MORELIA NEO III.
- Uses the same figure-8 notch shape for the eyelet area and zig-zag shoe lacing system as the MORELIA NEO III.
- AS (astro training) model for training on soil and asphalt.

# WAVE ENFORCE TOUR

## ENFORCE YOUR STRENGTH

This shoe is specially designed to enhance stroke motions to keep you powerful until the very end of the match. It is equipped with MIZUNO ENERGY CORE for energy return and cushioning against strong impact against the court, which supports translational movement. The flat sole and outrigger support strong rotational movement. The new Dyna-Heel Lock structure also improves the fit and stability of the ankle and heel.

### SPECIFICATIONS

WEIGHT	380g [U] / 315g [W]
SIZES	UK 6-11, 12 [U] / UK 4-8 [W]

**TARGET CONSUMER** For serious level (advanced level) baseliners and rearguard players. For players who play with strokes while keeping a firm grip on the ground, as opposed to players who tend to move lightly. For players who develop their game aggressively with powerful strokes.

**AW23 UPDATE** New Color

<b>25 - U</b>	Jet Blue / Bolt 2 (Neon) / Vulcan	<b>56 - W</b>	Candy Coral / Snow White / Neon Flame
---------------	-----------------------------------	---------------	---------------------------------------

### SUSTAINABILITY

More than 50% recycled content on upper body synthetic leather base fabric. More than 90% recycled content on upper body lining textile.

### BENEFITS

- Stroke motion (translational motion / rotational movement) are important for this
- To create translational motion, the heel and ball of the toe are equipped with MIZUNO ENERGY CORE for high energy return. Designed to cushion impact from the ground and achieve smooth weight transfer from the heel to the big toe.
- To support strong rotational movement, the flat sole and outrigger are adopted to widen the sole gauge, and CPU is applied to the upper to enhance the outer grip and stability.

# ***TECHNICAL***

## ***GLOSSARY***

# TECHNICAL GLOSSARY

## WAVE TECHNOLOGY

	<b>Parallel Wave</b> Wave technology which uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.		<b>Fan-shaped Wave</b> Wave technology which features various Wave heights, delivering excellent cushioning and stability.
	<b>Infinity Wave</b> Wave technology with a more visible and effective construction. Two parallel plates that sit together with soft cushioning pillars in-between to provide unrivalled cushioning and improved durability by absorbing and dispersing the impact at foot strike.		<b>Double Fan-shaped Wave</b> Wave technology that gives the highest levels of support combined with excellent cushioning.

## ALL SPORTS

	Inspired by nature, Wave is a unique midsole technology that provides both cushioning and stability. Wave's unique shape absorbs and disperses the impact at foot strike, which results in a smoother, more cushioned feel on every step.		ap+, a lightweight midsole compound offering rebound and cushion durability, providing a high level of comfort.
	The DynamotionFit system uses highly advanced motion capture and biomechanics technology. Mizuno has developed a design blueprint to engineer shoes that work with your foot throughout the gait cycle.	<b>AIRmesh</b>	Breathable and cool, AIRmesh allows each running shoe from Mizuno to maintain a high standard of breathability and comfort of the upper.
	Cool and Dry. Mizuno Intercool solves the problem of heat and humidity build-up in a running shoe. It does this by incorporating a full-length ventilation system in the sole of the shoe that removes heat and humidity from the foot through a system of ventilation channels.	<b>Removable INSOCK</b>	Removable insock for comfort and cushioning.
<b>SR touch</b>	An advanced lightweight cushioning material that absorbs shocks and keeps the transition smooth and fast due to its quick rebound properties.	<b>Premium INSOCK</b>	A high-grade removable insock for comfort and cushioning.
<b>MIZUNO COB</b>	MIZUNO COB (center of balance) is a midsole structure with multiple pods that activate body awareness to increase balance.		Provides a well cushioned landing with amazing energy return. This midsole material surpasses all expectations of comfort set by previous materials.
	Redefine what Energy return should feel like with this super soft and bouncy midsole material created by Mizuno for our top line products.		

# TECHNICAL GLOSSARY

## RUNNING TECHNOLOGIES

<b>AeroHug</b>	The new MIZUNO upper technology holds the foot stable during the run for a secure fit and an unrivalled comfort. A soft fabric mesh stretches and wraps around the foot to create the most comfortable ride.		Pebax® Powered Wave Plate for lightweight energy return
<b>X10</b>	Durability and Traction. X-10 is an extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and gives more traction at the heel strike.		The Wave Plate is constructed with a bio-sourced Pebax Rnew® plate. This provides extremely lightweight support and energy return, empowering athletes with every step.
	XtaRide, Mizuno's technical trail concept featuring X lugs and Xta groove, leads to trail shoes that adapt to their surroundings and work in perfect harmony with the body.		An evolutionary lightweight midsole that delivers stress-free cushioned rides with high rebounds. It gives an energised, euphoric and super-comfortable run.
	G3, an advanced performance outsole component that enhances traction where needed most and reduces weight.	<b>ESS Rock Plate</b>	An extra solid sheet rock-plate in the forefoot which provides superb protection against stones and rock.
	A unique midsole compound providing high comfort and performance, while being extremely lightweight.		Waterproof, breathable fabric membrane upper technology.
	An original rubber compound developed by Michelin that provides more grip and comfort.	<b>Blown Rubber</b>	The pressure absorbing blown rubber outsole optimizes pressure distribution throughout the forefoot.
	An engineered approach to minimise the rapid acceleration and deceleration of the foot during transition, creating the smoothest ride possible.	<b>XPJP</b>	A completely new type of midsole compound that delivers cushioning, rebound and durability at a high level. The exquisite harmony of the super soft and advanced cushioning with high energy return makes you feel as if you are floating on water.
<b>WAVEKNIT</b>	A knit construction inspired by our Mizuno Wave technology. It's dynamic stretch and hold abilities provides a sock-like fit that feels natural every step.		A outsole construction that provides superior grip on various surfaces thanks to it's adaptive abilities. Allows for high traction on soft surfaces and high friction on firm surfaces.
<b>ELB</b>	A lightweight midsole compound providing high level cushioning and rebound for energy efficient runs.		

# TECHNICAL GLOSSARY

## FOOTBALL & RUGBY TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		Grippy insock material that stops the foot from sliding inside the shoe.
	Upper delivers a high level of softness and durability with a structured fit.		R-Fiber mesh controls the upper stretch and securely holds the foot during acceleration and turns.
	A unique midsole compound providing superb comfort and performance, while being extremely lightweight.		Highest kangaroo leather quality for premium comfort fit and natural ball touch.
	It is a revolutionary concept, with an integrated memory foam construction which controls three key performance characteristics: Fit, Stability and Touch.		

## RACKET SPORTS TECHNOLOGIES

	A unique upper providing the highest level of softness and durability, while maintaining breathability.		A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
	An exceedingly lightweight midsole material with excellent comfort and resilience properties.		Durability and Traction. X10 provides extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and provides more traction at the heel strike.
	Dynamotion Groove - an innovatively constructed outsole using specifically designed flex grooves to improve stability and on court agility.		The BOA Fit System contains three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. It is engineered to optimize fit and provide precision, adaptability, and control.

# TECHNICAL GLOSSARY

## INDOOR TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		An exceedingly lightweight midsole material with excellent comfort and resilience properties.
	A performance outsole component that enhances traction where needed most.		Specifically designed flex grooves in the outsole to improve stability and on court agility.
	Dura Shield protects your toes and increases the product durability.		Super soft and durable synthetic collar lining insert which adds comfort and durability when using ankle braces.
	A shock-absorbing cushioning compound.		

# TECHNICAL GLOSSARY

## APPAREL TECHNOLOGIES

	Mizuno DryLite technology draws excess moisture away from the body, creating a comfortable and dry microclimate for best performance.		Mizuno FreshPlus technology adds an anti-bacterial and deodorising function to your garment, creating a fresher and odour reducing product.
	Mizuno Bodymapping technology provides enhanced air circulation inside the garment, keeping the body cool and dry.		Mizuno DynamotionFit technology is based on anatomical research to create patterns that give improved garment fit and full freedom of movement.
	Mizuno's BIOGEAR is based on in-depth scientific research into the human exercise physiology and biomechanics. It helps to maintain body balance, improve performance and reduce the fatigue of muscles and joints during sport by controlling stretch, pressure and shape.		CoolTouch technology provides a soft feeling and leads to extremely quick drying.
	Mizuno ImpermaLite technology provides a performance blend of water and wind protection combined with superior breathability.		BlindStitch construction provides flat seams for anti-abrasion and enhanced comfort.
	NightLite, with its reflective material, provides superior retro reflection for low light running.		Breath Thermo is an extremely innovative thermal fabric yarn. It captures escaping body heat and, through a patented reaction in the yarn, generates heat-returning warmth to the body.
	Mizuno Warmalite technology recycles body heat, creating an insulating warm layer between body and garment.		SolarCut technology reflects sunlight ultraviolet waves by reducing the light transmission and thus keeping the body cool.
	Saving water with pure performance. Waterless dyeing process, without added chemicals, that saves up to 25 liters of fresh water per tee shirt dyed.		Keeps high breathability in case of sweaty. Dry material with high heat release. Keeps high breathability in case of sweaty. Dry material with high heat release.
